

**Challenges & Opportunities in Environmental Planning  
Spring 2017  
11:573:409, index #18658, 3 credits**

***What do “Sustainability” and “Resiliency” look like in a state that is almost completely built out?***

Center for Urban Environmental Sustainability (CUES) Case Studies provide an opportunity to explore Environmental Planning concepts with a focus on New Jersey regions and communities. Readings, lectures, site visits and in class projects will consider the influences of environmental, social, political, and economic factors that drive landuse decisions and affect environmental planning. We will explore new approaches to existing policies and practices that could improve future planning decisions.

**Time:** Monday & Thursday, Period 6 (5:35 – 6:55 PM)

**Place:** Blake Hall, Room 128

**Instructor:** Dr. Beth Ravit, 848-932-9334
